

Packages and paper

Please leave packages and paper at a recycling station (Återvinningstation)

Paper
e.g. carton, corrugated cardboard, paper bags, milk packages

Plastic
e.g. clean plastic bottles, buckets, cups, bags, foil, lids

Coloured / uncoloured glass
e.g. clean bottles and jars without lids

Metal
e.g. clean tins, aluminium foil, caps, lids, empty spray cans

Newspapers
e.g. magazines, catalogues, handouts, paperbacks

FTI is responsible for the recycling stations.

Waste that will be collected after reservation

For collection of hazardous waste or heavy/electric waste, please contact Ragn-Sells or your landlord.
It is also possible to hand in this waste at the municipal recycling location ("Återvinningscentralen").

Hazardous

All homes must have access to a chemical waste box for

acetone, paint, glue- and lacquering waste, light bulbs, energy-efficient lamps, tubular lamps, sprays, nail polish, chemicals, splash oil, small batteries, mercury thermometers etc.

Leave the hazardous waste in the original package or declare the content clearly. Seal the packages properly and check that they are not leaking. Do not mix different substances.

If you live in a rented home ask your landlord how to do.

Please hand in medicine to the pharmacy (Apoteket).

Heavy and electric

Metal waste e.g. bicycles, cutlery, lawnmowers (without fuel and oil)

Burnable waste e.g. plastic toys, carpets that fits not in the red bag

Piece of furniture e.g. cupboards, sofas

Landfill waste e.g. wash basins, toilets

Electric waste e.g. electric- and battery products, refrigerators

Sort the waste in bags and mark it by METALL, BRÄNNBART (burnable), DEPONI (landfill) or ELAVFALL (electric).

If possible split up heavy waste in items of max. 15 kg. Non dividable materials will be collected as a whole.

If you live in a rented home ask your landlord how to do.

Note!

Construction and demolition waste is not household waste.

Waste that belongs in the waste bin

Please sort the waste in plastic bags. Tie the plastic bags with two knots. Put the bag in the waste bin. Please don't overfill the waste bin. To get new bags, tie a red or green bag at the handle of the waste bin.

Compostable

Waste that can be compostated

left over food (raw or cooked), coffee grounds and -filters, teabags, fruit, vegetables, meat, bones, flowers, leaves and roots from pot plants, eggshells, edible oil etc.

Please put only compostable waste in the green bag. Other kinds of waste will disturb the composting process.

Burnable

Waste that is neither packages or paper

nappies, sanitary towels, vacuum cleaner bags, postcards, dish brushes, dog litter bags, envelopes, toothbrushes, books with hard cover, chewing tobacco, cigarettes, textile, plastic toys and -cutlery, shoes, chewing gum, kitchen rolls, cleaning cloths etc.

Examples of waste that can be added to burnable waste in small quantities:

china, stoneware, drinking glasses, mugs, cat sand, ash (cold).

Please use red or other plastic bags that are not completely green.
